

○ Help create a sustainable future

NSW Clean Energy Knowledge Sharing Initiative

Showcase your success with the NSW Clean Energy Knowledge Sharing Initiative

The NSW Clean Energy Knowledge Sharing Initiative is a Department of Planning and Environment program designed to support you as an early adopter of clean energy.

The initiative aims to:

- Share and showcase new technological solutions and clean energy business models to encourage further advanced development and implementation
- Break down barriers to entry for clean energy technologies and business models, particularly for new and novel technologies in a NSW context
- Provide a support framework for up and coming clean energy projects.

Applications are open until 28 February 2018 or until otherwise communicated on the program website.

How to apply

Email sustainable.energy@planning.nsw.gov.au and advise which stream you wish to apply for. Each project may only apply under one stream, but an applicant may apply for funding for multiple projects.

Where can I find out more?

- Visit resourcesandenergy.nsw.gov.au/clean-energy-initiative
- Call 1300 305 695
- Email our Clean Energy Programs team at sustainable.energy@planning.nsw.gov.au

Apply for one of three streams

- 1. Case studies** of existing innovative clean energy projects. The NSW Department of Planning and Environment will fund the development of a case study about your completed project.
- 2. Funding support for feasibility studies** to investigate business models or innovative clean energy technologies in NSW.
- 3. Funding support for pilots and demonstrations** of innovative clean energy technologies and business models in NSW.
